LinkedIn · GitHub · Portfolio

Full-Stack Web Developer — React, JavaScript, Node.js. Build & deploy user-centric apps with strong loading/error states. Open to internships or junior frontend roles in Hyderabad (can join onsite immediately).

TECH SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, responsive/mobile-first design

Backend: Node.js, Express, MongoDB (Mongoose), JWT authentication

Tools: Git, GitHub, Vite, Postman, Render, Netlify, Vercel

Core: Async/Await, API integration, loading skeletons, error handling, React Router

FEATURED PROJECTS

VibeCart — Full-Stack E-Commerce | (React, TypeScript, Node.js, Express, MongoDB) | ***Live*** · ***GitHub***

- Built and deployed a full-stack e-commerce platform with product catalog, cart, checkout, and user accounts (JWT auth).

- Designed MongoDB data models and implemented persistent cart tied to user accounts (replaced localStorage-only flow).

- Resolved production deployment bugs (Express route-ordering and env config) to launch stable backend on Render.

TechStore — Frontend E-Commerce | (React, Tailwind, localStorage) | ***Live*** · ***GitHub***

- Implemented global cart state using React Hooks and Context to calculate totals and quantities in real time.

- Persisted cart using browser localStorage so cart survives session refreshes; added UI guards to prevent negative quantity values.

Movie Engine — Movie search & details | (React, OMDB/TMDB API, React Router) | ***Live*** · ***GitHub***

- Built multi-page app with deep links to movie detail pages; implemented 500ms debounce to reduce API calls by ~70%.

- Implemented skeleton loading screens, offline network error messages, and retry flows for robust UX under poor network conditions.

EDUCATION

Bachelor of Computer Applications (BCA) — Manipal University | 2026 – Expected 2029
Responsive Web Design Certification — freeCodeCamp (300 hrs) | 2026
Toppers Junior College — Intermediate (Hyderabad) | 2024
